

## Fairground Equipment / Livestock Panels

We have been supplying stalls, pens, panels and gates to county and state fairs all around the United States for decades. We supply what you need. Please [contact us](#) for more information or to ask for a bid from us. We will compare our quality and prices with anyone...and win!

The above photograph shows a ten-pen unit, and units are available in different numbers of pens and sizes of pens. A pen series can be placed in an arena and can be part of a partition. Gates swing in and out and lock shut. The patented latch eliminates parts and permits fast assembly.

### Weldy Livestock Panel Features:

- Designed for double rows or single rows.
- Wall brackets are available for single rows along a wall.
- Panels are latched together and because of weight are not easily moved.
- The patented latch has no loose parts.
- Panels assemble and disassemble quickly.
- Gate panels swing either way from either end.
- Vertical rods do not permit climbing.
- Panels and gates last almost indefinitely.
